Skills

- JavaScript | TypeScript | Python | Node.js | React.js | Next.js | Vue.js | Angular.js | MongoDB
 - React-Native | Tailwind CSS | Bootstrap | Styled Component | SCSS | Redux | Redux-Toolkit
 - Wordpress | Git | Github | Frontend | Backend | Firebase | Strapi | English, Hindi, Bangali
- All professional proficiency or above

Projects

- **EasyShop Multipurpose Ecommerce app**
 - **Next.js:** I used Next.js for server-side rendering (SSR) and it's useful for SEO.
 - **Tailwind CSS:** I used Tailwind for fast coding and responsive efficient design.
 - **TypeScript:** Ensured type safety and improved code quality throughout the project.
 - **Node.js:** Built the back-end server using Node.js, Express, and RESTful APIs.
 - **MongoDB:** Utilized MongoDB as the database to store product information, user profiles, and order history.
- **Dusk - Personal Portfolio Template**
 - This template is approved by [TemplateMonster](#).
 - For ui/ux design I used Figma.
 - I used React.js and TypeScript, and built reusable components for this template.
 - I've made powerful optimizable scroll animations with GSAP for this interactive website.
 - For styling or user-interface and responsive design I used the power of Tailwind css.
- **Personal Blog app (FullStack)**
 - This is my personal blog app here I share my thoughts and knowledge about programming and webdevelopment
 - For user interface and frontend I used Nextjs, React, Tailwind CSS and Shadcn UI. And for backend I used Node.js and MongoDB
